Instructions for Neutral 103 Disinfectant

If you do not have the lock and dial system

1) Mix 2 ounces of solution to one gallon of water or (8) eight caps. Pour the solution into water then shake.
2) After solution is mixed, saturate mixture over the top of the wipes.
3) Only use 1 quart of the mixture per bucket.
4) Pull one wipe from the center of the roll and thread through the hole in the top of lid, then secure lid to the bucket.
5) If you want to mix a quart, use 1 tablespoon of solution per quart.
6) Now, you are ready to sanitize/disinfect.
